EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Arthur Gardner on Tuesday July 21st, 2009.

The application has been amended as follows:

Specification, page 3, [0014], line 3; inserted --, or support arms,-- after "upwardly angled portions"

Claim 10, line 4: inserted the word --*directly*-- after "footholds" and inserted the word --*only*-- after "attached"

Claim 16, line 4: inserted the word --*directly*-- after "devices"

Added The Following Four (4) New Claims:

Claim 21 (New): The climbing tree stand assembly of Claim 10, wherein the rigid footholds comprise substantially rigid molded plastic.

Claim 22 (New): The climbing tree stand assembly of Claim 10, wherein the clamping portion comprises a yoke for fastening to one of the support arms.

Claim 23 (New): The improvement of Claim 16, wherein the rigid foothold devices each comprise substantially rigid molded plastic.

Claim 24 (New): The improvement of Claim 16, wherein the clamping portion comprises a yoke for fastening to one of the support arms.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the primary reason for allowance of claims 10 and 16 (as amended above) and their respective dependent claims, is the inclusion of the pair of rigid footholds attached directly and only to the support arms of the climbing tree stand, wherein the rigid footholds each comprise a curved body portion and a clamping portion that is attached to the support arms of the climbing tree stand.

Prior art such as Prejean (US 6,988,588), Baker et al. (US 3,460,649) and Merritt (US 4,549,633) all teach various forms of climbing tree stands with both rigid and flexible footholds attached to the tree stand, but none demonstrate curved rigid footholds clamped directly and only to a support arm of the climbing tree stand, or motivation to provide a clamped foothold on the support arms. Rather such prior art references teach various footholds secured to the platform portions of the tree stands

and do not teach or suggest securing such footholds to the arm portions only and using a clamping portion for such an attachment.

References such as Curtis (US 2,057,013) and Galbraith (US 817,969) teach various forms of clamps. Curtis teaches a clamping portion for a foot platform on a stilt and Galbraith teaches a clamping portion for a bedside footrest, neither reference providing any teaching or motivation to be combined with a foothold on a climbing tree stand. Additionally, as the applicant persuasively points out in arguments directed to Curtis, it would not be obvious to one of ordinary skill in the art to combine such teachings of clamps with a tree stand climbing device.

Absent the applicant's disclosure there is no teaching of a climbing tree stand the having a pair of rigid footholds attached directly and only to the support arms of the climbing tree stand, wherein the rigid footholds each comprise a curved body portion and a clamping portion that is attached to the support arms of the climbing tree stand.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to COLLEEN M. QUINN whose telephone number is

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Katherine Mitchell can be reached on (571) 272-7069. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
